

YOUNG GLOBAL CITY LEADERS: BUILDING AN EVIDENCE BASE IN LONDON, NEW YORK AND TORONTO TO SUPPORT THE NEXT GENERATION OF SCHOOL LEADERSHIP INNOVATION

PARTICIPANT CONSENT FORM INDIVIDUAL INTERVIEW

THE RESEARCH PROJECT

Global Cities are internationally important sites of migration, diversity and innovation. London, New York and Toronto consistently rank within the top 10 Global Cities and will serve as sites for our new 3-year ESRC-funded research project. Based on the preliminary evidence, many Global Cities are facing school leadership shortages and, as a result, deputy and school-level leaders are taking up posts at younger than ever ages in urban centres. This shift marks the entrance of a new generation of school leaders most of whom belong to GenerationX (GenX) - born between 1960-80. While GenXers are often described as flexible, globally engaged, technologically savvy, accepting of diversity and collaborative, there is little previous research related to age and leadership. More specifically, there is little research exploring this new generation of educational leaders.

Our overall research explores the experience and expertise of this next generation of leaders. We will be working with city-based Advisory Groups of policy/practice experts and cohorts of 35-45 GenX leaders in our annual Young Leader Networking events. Our school-level case studies will explore issues of educational change and leadership within school led by young leaders. We are interested in issues related to collaboration, capacity building and school improvement strategies. Our project outcomes will include City-based leadership profiles, policy briefs, within and across city interview analysis and school-level studies. Evidence will support policy and programme decision-makers and the leaders themselves.

THE CORE RESEARCH TEAM

Dr. Karen Edge (Institute of Education-University of London) is the Principal Investigator for this study. Paul Armstrong (Research Officer), Nuria Batlle (Administrative Officer), Eugene Dapper (PhD Fellow), Juliet Horton and Katherine Descours (Visiting Research Associates) are also engaged in the project.

OVERALL RESEARCH STRATEGY

The Economic and Social Science Research Council (ESRC) in the United Kingdom is funding our research. The study will proceed in the following phases:

- Phase 1 (Year 1): Developing city-based demographic leadership profiles
- Phase 2 (Year 2): City-based policy and programme profiles
- Phase 3 (Year 1/2/3): Young Global City Leader (YGCL) Networks
- Phase 4 (Year 2/3): Young Global City Leaders Interviews
- Phase 5 (Year 3): School-based studies

THE INTERVIEW

We will conduct the interview with you at a mutually convenient time, date and location. The interview will last for **45-60 minutes**. Your participation is voluntary and you may refuse to participate in the study.

WHY YOUR PARTICIPATION IS IMPORTANT

By taking part in this project you will be contributing to the largest research study of its kind on the next generation of leaders internationally. As a participant, you will receive a copy of the city-based reports from our overall findings. You will also receive the cross-city reports and we will ensure that you receive copies of each interim and final report produced about the research. We will also invite you to any dissemination events that we hold to share our findings. If you wish, we will identify you as having contributed information to the project and you will be asked to sign an additional consent form. Your school will also be required to sign an additional consent form in order for your information to be publicly shared.

PRIVACY AND CONFIDENTIALITY

Your participation in this study will remain confidential. While we would like to audiotape your interview, you are free to decline it or to turn off the recorder at any point during your interview. Following the interview, your audiotape will be transcribed. For the duration of the study, all tapes will be stored at the IOE-London and will not be available to any person beyond the research team. You will also be assigned a pseudonym immediately upon completion of your interview. During our analysis and writing of the reports, your name and the name of your school will not be included on the raw data, draft documents or final versions. While we may use quotes from your interview, they will never be attributed to you. Only the research team will have access to the raw data and pseudonyms. However, if you wish to make your name or your school's name public, the research team will provide a consent form for this purpose.

Once the project has ended, current ESRC data policy states that all project data is shared and deposited with the UK Data Archive. If you would like more information as to how this data is stored and how it might be used in the future please follow this link <http://www.data-archive.ac.uk/create-manage/consent-ethics/consent?index=7>

THE PRODUCTS

The principal products of the study related to your contribution will be:

School-based case studies: Young leaders and educational change (London, New York, Toronto mini reports)

The findings from the school-based case studies will also serve as the foundation for the final report to the funding agency. Other possible products include scholarly articles and academic conference presentations. We would be happy to work with you to develop scholarly articles related to your contribution for joint authorship or conference presentation.

CONSENT

I agree to participate in an interview for this research project. I am aware that my participation is voluntary and I may withdraw at any time, without fear of penalty. I have retained a personal copy of this letter.

Print Name	Signature	Date	City
Email Address	Contact Phone Number		

- ☐ I agree to have my interview audio taped.
- ☐ I **do not** want my data shared with the UK Data Archive at the end of the project. My data must be confidentially destroyed two years after completion of the study.

If you have any questions about the project, please do not hesitate to contact Dr. Karen Edge at k.edge@ioe.ac.uk or Paul Armstrong at p.armstrong@ioe.ac.uk. For questions pertaining to the Institute of Education and research safety, please contact Associate Director, Professor Michael Reiss at m.reiss@ioe.ac.uk
