

This archive contains files containing data and analysis from

Project ES/K001477/1

THE HEARING BODY: How auditory perception influences body representation

The following files have been archived:

File name	Description
TjaduraJimenez_Banakou_ChildVoice_Data.csv	CSV file containing a dataset generated by collecting questionnaire data, behavioural data and physiological data from individuals experiencing different virtual body and voice conditions. The dataset contains 48 variables.
VariableDescriptions.pdf	This file contains descriptions for the 48 variables in the file TjaduraJimenez_Banakou_ChildVoice_Data.csv
ParticipantInformationSheet.pdf	Project information sheet given to participants in experiments.
Demographics questionnaire.pdf	This file contains the demographics questionnaire participants filled at the beginning of the experiment.
Post-experience questionnaire.pdf	This file contains the questionnaire participants filled in at the end of each experimental session.

These files correspond to the results reported in the following paper:

Tjadura-Jiménez, A., Banakou, D., Bianchi-Berthouze, N., Slater, M. (2017). Embodiment in a Child-Like Talking Virtual Body Influences Object Size Perception, Self-Identification, and Subsequent Real Speaking. *Scientific Reports*.
