

## ES/P002501/1 Improving Organic Resource use in rural Ethiopia (IPORE)

### Readme

#### Overview

Data on household use of organic resources including dung, wood and crop residues and their time use from Halaba district, Southern Nations, Nationalities and Peoples' Region in Ethiopia.

To capture seasonality households were, where possible, interviewed twice. A Baseline Data: collected in October 2016. Second Round Data: collected March/April 2017. A cross survey identifier matches households which participated in both surveys.

In addition to organic resource and time use questions, the baseline survey has information on assets and land use, and the second has limited information on marketing.

#### Collection Methods

Random sample of households drawn from list provided by local district authorities. Face-to-face interviews with trained enumerators with data recorded on Tablets, using ODK collect

The questionnaire questions were developed in Excel, then forms created for the Tablets (see [opendatakit.org](http://opendatakit.org/)). The question structure of the questionnaire can be further explored by using a variety of freeware software e.g. Kobo Toolbox <http://www.kobotoolbox.org/>

Available Filename	Description	Source Questionnaire
