Survey ID: 391

570 households

Sample Duration: 30 Day(s)

Notes: This survey covered families in the urban area of Kusami with some kind of regular income but did also include the unwaged. The criteria for the sample is summed up in the report as follows: 'African families of 2-8 persons at least one of whom was an adult female, with 1-3 incomes from all [i.e. any] sources, but with any wage income within the range £5-£15 a month, excluding families in villages on the outskirts of the urban area'. Although 15 items of expenditure were recorded, these are not reported by expenditure distribution - only the percentage proportion of food to overall expenditure is given within the distribution.
