Notes:

1. Responses are typically unprompted unless questionnaire indicates otherwise.
2. Field investigators were encouraged to use 'other' category if unsure about field coding
3. dropped operational questions to facilitate questionnaire flow, e.g. whether house is residential or non-residential
4. dropped village coordinates and names to preserve anonymity
5. dropped observations who did not agree to data sharing
6. dropping network information to preserve anonymity
7. Question 11a dropped due to time constraints
8. Question 11i dropped and recoded for network data set
9. 'xv. unusual detail' was used for field notes - removed to preserve anonymity.
10. 'xiii. details on other people present in interview removed to preserve anonymity.
11. dropped automatically calculated interview duration variable as one session may include several interviews

q12_2a_acttalk:

1. The following variables have been coded based on pre-coded and full-text responses.

q12_3a_posteryn:

1. The following variables have been coded based on pre-coded and full-text responses.

q12_3c_prompted:

1. field investigators initially elicited answer categories. this variable indicates when this took place.

q16_1_abseen:

1. The following names of antibiotics are an aggregate of unprompted and probed elicitation. The separated categories are presented at the end of the data set.

q16_2_abname_11tot:

1. These variables have been coded based on pre-coded and full-text responses.

q16_3_abpurp_1:

1. These variables have been coded based on pre-coded and full-text responses.

q16_4_ab_buy:

1. Recoded. Read responses fall in category "undesirable" as "absence of desirable response".

q16_5_ab_alt:

1. Recoded. Read responses fall in category "undesirable" as "absence of desirable response".

q16_6_ab_fin:

1. Recoded. Read responses fall in category "undesirable" as "absence of desirable response".

q16_9_ab_res:

1. Recoded. Read responses fall in category "undesirable" as "absence of desirable response".
