Notes:

- Responses are typically unprompted unless questionnaire indicates otherwise.
- Field investigators were encouraged to use 'other' category if unsure about field coding
- dropped operational questions to facilitate questionnaire flow, e.g. whether house is residential or non-residential
- dropped village coordinates and names to preserve anonymity
- dropped observations who did not agree to data sharing
- dropping network information to preserve anonymity
- Question 11a dropped due to time constraints
- Question 11i dropped and recoded for network data set
- 'xv. unusual detail' was used for field notes - removed to preserve anonymity.
- 'xiii. details on other people present in interview removed to preserve anonymity.
- dropped automatically calculated interview duration variable as one session may include several interviews

q12_2a_acttalk:

- The following variables have been coded based on pre-coded and full-text responses.

q12_3a_posteryn:

- The following variables have been coded based on pre-coded and full-text responses.

q12_3c_prompted:

- field investigators initially elicited answer categories. this variable indicates when this took place.

q16_1_abseen:

- The following names of antibiotics are an aggregate of unprompted and probed elicitation. The separated categories are presented at the end of the dataset.

q16_2_abname_11tot:

- These variables have been coded based on pre-coded and full-text responses.

q16_3_abpurp_1:

- These variables have been coded based on pre-coded and full-text responses.

q16_4_ab_buy:

- Recoded. Read responses fall in category "undesirable" as "absence of desirable response".

q16_5_ab_alt:

- Recoded. Read responses fall in category "undesirable" as "absence of desirable response".
