

This archive comprises files containing data and analysis from

Project MR/P024920/1

OneHealthWater: Drinking-water under a “One Health” lens – quantifying microbial contamination pathways between livestock and drinking-water

The following files have been archived:

File name	Description
OHW_PHM_Data_v1c.zip	This is a zip bundle of eight ESRI Shapefiles generated by the OneHealthWater participatory hazard mapping sub-study in Siaya County, Kenya in 2018. The dataset contains water sources, potential contamination hazards, and other features such as water bodies and roads.
OHW_PHM_DataDictionary.pdf	This file explains the ESRI Shapefiles and the variables contained in their attribute tables.
OHW_PHM_Questionnaire.pdf	This file contains the questions for key informants in the OneHealthWater participatory mapping exercise.
OHW_PHM_ConsentForms.pdf	This file contains a participant information sheet and consent forms in English and Dholuo for study subjects taking part in the OneHealthWater participatory hazard mapping sub-study.
OHW_PHM_Report.pdf	This file is a technical report that contains the details on study background, methodology, and key findings of the OneHealthWater participatory hazard mapping exercise.
