

## INFORMATION SHEET FOR PARENTS/CARERS

### Numer8ED: Cross-format number integration and its relationship to mathematics performance

**Researchers:** Dr Francina Clayton, Clare Copper, Marta Wesierska, Rebecca Reed and Christina Roberts  
(**Supervisor:** Dr Silke Göbel)

Your child is being invited to take part in the second time-point of our three-year research study. Before you decide whether your child would like to take part, it is important for you to understand why the research is being done and what it will involve. Please ask if you would like more information.

#### What is the purpose of the study?

This research project is investigating whether the ease with which children translate spoken number words (e.g. 'four') to Arabic digits (e.g. 4) is foundational for mathematical development in primary school.

#### Why has my child been chosen?

As part of this research, we are hoping to complete a second (follow-up) assessment with as many children as possible that were invited to take part in the first assessment in 2017. These children are now aged between 6 and 7 years (from Year 2). Your child has been chosen to take part because they fit these criteria. The head teacher of your child's school has provided consent for the Year 2 children to be invited to take part again.

#### Does my child have to take part?

No. This is an entirely voluntary project. If you choose not to participate it will not affect you or your child in any way.

If you do not want your child to participate in this study, please send an email to [numer8ed@york.ac.uk](mailto:numer8ed@york.ac.uk) telling us the name of your child, the school your child is going to and the class your child is in. Alternatively, you may prefer to fill in the slip at the bottom of this page and hand it in to your child's teacher to be passed to the researchers.

If you would like your child to participate in this study, you do not need to reply to this letter. Even if you do not opt your child out, you will still be able to withdraw your child at any time and without giving a reason.

#### What will my child be asked to do if we agree to take part?

Children will be assessed at three time-points, with the first assessment already completed at the end of Year 1, the second scheduled to take place at the end of Year 2 and the final time-point approximately 12 months later, in accordance with your school's timetable. For example, testing could take place in June 2017, June 2018 and June 2019.

At the second time-point, children will complete one individual assessment session and two classroom assessment sessions. An audio voice recording will be taken during the individual assessment.

Individual activities: Will include short individual measures looking at children's number knowledge, reading and attention.

- Number and single word/non-word reading
- Computer based number task measuring quick recognition of number words
- Computer based reaction time game measuring response speed and attention

Classroom activities: Will include measures of numeracy and number sense.

- Numeracy (timed and non-timed maths problems e.g.  $2 + 7 =$  )
- Number writing (translating number words to Arabic digits)
- Comparison tasks (e.g., which is the larger number 5 or 9?)

### **Where will the research sessions take place?**

The session will take place in school. The total testing time for individual sessions should not exceed 30 minutes. Classroom based sessions will take around 90 minutes in total and will be completed across two sessions. Children will be able to take a short break during each session and will be rewarded with a sticker for their participation. Every effort will be made to ensure that the research sessions are as enjoyable and relaxed as possible for the children.

### **Who will run the research sessions?**

Our researchers have Disclosure and Barring Service (DBS) clearance for working with children. Dr Francina Clayton, Clare Copper, Marta Wesierska, Rebecca Reed and Christina Roberts will meet the children taking part and run the sessions.

### **Will all my child's details and the assessment results be kept confidential?**

We would like to assure you that information from the study will be kept strictly confidential. Children's results will be identified by code number only. Audio voice recordings will only be used by researchers to verify the information taken on the individual measures. Audio data will be deleted to guarantee the anonymity of the children's identity and will not be used in future research. All data will be collected and stored in accordance with the Data Protection Act 1998. This study has been approved by the University of York Psychology Research Ethics Committee (Project ID Number: 559).

We will not provide data about individual children to their parent/carer. We can provide feedback to schools if they request it. The schools are aware that this information has been obtained for research purposes and would not therefore inform education or therapeutic needs. Thus, any individual feedback requested by the school must remain confidential. Individual results cannot be given to the children themselves or to parents.

Please do not hesitate to contact the researchers if there is anything that is not clear or if you would like more information.
