#### IV. Reading Comprehension: Read and understand a paragraph and answer questions

##### Shanti and her grey cat

*My name is Shanti and I am eight years old. My little brother is Sunil and he is four. We like to play with our cat. Our cat is grey and fat and she likes to hide behind the door.*

*One day, our cat went missing.*

*'I wonder where the cat has gone?' I said.*

*We thought she was just playing hide and seek, but we could not find her in her favorite places. So we searched all around the house for the cat.*

*Finally, we found her under the bed, but she was not alone!*

*Sunil exclaimed: 'she has given birth to three kittens: two grey and one white.'*

Now answer the following questions by MARKING the correct response:

Q.1. Who is telling the story?

- a) Sunil ☐
- b) The cat ☐
- c) Shanti ☐

Q.2. What do Shanti and Sunil like to do?

- a) They like to hide behind the furniture ☐
- b) They like to play hide and seek ☐
- c) They like to play with their cat ☐

Q.3. Why did Shanti and Sunil say the cat was not alone?

- a) Because she had given birth to 3 kittens ☐
- b) Because she was playing with a dog ☐
- c) Because she was with their parents ☐

Q.4. Where did Shanti and Sunil find the cat?

- a) Under the rug ☐
- b) Under the table ☐
- c) Under the bed ☐

### SET E

#### V. Reading comprehension:

The information below is from a booklet about bees. Refer to the information to answer the questions which follow it.

Bees make honey to survive. It is their only essential food. If there are 60,000 bees in a hive about one third of them will be involved in gathering nectar which is then made into honey by the house bees. A small number of bees work as foragers or searchers. They find a source of nectar, then return to the hive to tell the other bees where it is.

Foragers let the other bees know where the source of the nectar is by performing a dance which gives information about the direction and the distance the bees will need to fly. When the bees arrive at the hive carrying nectar they give this to the house bees (worker bees which work inside the hive). The house bees move the nectar around, exposing it to the warm dry air of the hive. When it is first gathered the nectar contains sugar and minerals mixed with about 80% water. After ten to twenty minutes, when much of the excess water has evaporated, the house bees put the nectar in a cell in the honeycomb where evaporation continues. After three days, the honey in the cells contains about 20% water. At this stage, the bees cover the cells with lids which they make out of beeswax.

At any one time the bees in a hive usually gather nectar from the same type of blossom and from the same area. Some of the main sources of nectar are fruit trees, clover and flowering trees.

**Q.1.** Which of the following, according to the passage, is the essential food of bees?

- a. Fruit
- b. Honey
- c. Beeswax
- d. Clover

**Q.2.** What is the main task of forager bees?

- a. To make honey from nectar
- b. To find source of nectar and tell other bees where it is
- c. To make a hive for bees to live in
- d. To defend the hive from insects and animals

p 31

**Q.3.** What proportion of bees, according to the passage, are involved in gathering nectar to make honey?

- a. Half of all bees in a hive
- b. Two-thirds of all bees in a hive
- c. One-fourth of all bees in a hive
- d. One-third of all bees in a hive

**Q.4.** How do forager bees tell other bees where a source of nectar is?

- a. By flying towards the source
- b. By performing a dance
- c. By building a cell in a honeycomb
- d. By making special sounds

**Q.5.** What is the main difference between nectar and honey?

- a. The proportion of water in the substance.
- b. The proportion of sugar to minerals in the substance.
- c. The type of plant from which the substance is gathered.
- d. The type of bee which processes the substance.
