

## Organisation Consent Form

### Children and young people's nature engagement and advocacy in the UK

I have read the information sheet, have been given the opportunity to ask questions and am happy to give my consent to the following:

1. I agree for the organisation to take part in the research.
2. I am happy for the researcher to observe and engage with young people involved in the organisation, engage in small group discussions and interview young people previously engaged with the organisation.
3. I understand that choosing to participate as a volunteer in this research does not create a legally binding agreement nor is it intended to create an employment relationship with the University of Sheffield.
4. I understand that the personal details of young people and staff participating in the research will not be revealed to people outside the University of Sheffield research sub-project unless expressly agreed to be included in the case study reports. I understand that the University of Sheffield sub-project researchers are the only people with direct access to the raw data.
5. I understand and agree that the data from the research will be used for publications, reports, web pages, and other research outputs.
6. I understand and agree that other researchers within the Voices of the Future Team may use the anonymised summary fieldnotes to inform writing in publications, reports, web pages, and other research outputs.
7. I understand that if young people or staff chose to not be represented in research, they can do so ideally before or during the event, but at the latest, one month after.

Additionally, I am willing to give consent for:

1. Observations (if virtual) to be audio recorded (for note taking purpose only) Y/N
2. Online group discussions to be audio recorded (for note taking purpose only) Y/N
3. Taking photographs (of events/activities) Y/N
4. I give permission for a fully anonymised version of the data (fieldnotes from observations, interviews and focus groups) to be deposited in UK Data Service so it can be used for future research and learning by UK universities. Y/N
