

## **CLIMATE RESILIENCE CO-PRODUCTIVE WORKSHOPS**

### ***Aims and Objectives***

#### ***For Participants:***

1. Develop understanding of climate resilience and its potential impact on heritage buildings
2. Learn of experiences of past projects
3. Generate ideas and fresh thinking for their area
4. Create connections with CCB and others working in this sphere

#### ***For Researcher:***

1. Create appetite for action on climate resilience
2. Get feedback on work up to this point
3. Gather knowledge on pathways/governance strategies
4. Reveal new potential case studies

### ***Background and pre-event:***

The purpose of this event is to create an environment where those involved (or wanting) to be more involved in taking forward climate resilience actions in the local church can share experiences and knowledge. Participants will largely be those involved in the DAC, or in climate related actions within their churches. There will be 10 workshops in total.

Each workshop will begin with a presentation given by the researcher or associate involved in the previously run Leeds Diocese Climate Resilience project (researcher will then take back over to introduce and run the workshop), giving time for table discussion and then a co-productive session working through barriers, opportunities, and paths to success for climate resilience projects.

Times given are approximate considering a 2pm start time. Additionally, we will try and ensure that representatives from the same area/DAC/church are not on the same table. Each table will have pens, sheets of paper and coloured post-it notes.

### **Researcher Intro and welcome 2 - 2.05**

#### ***Table Intro's – 5 MINS***

Just want a round-the-table introduction from everyone, literally name, title and favourite animal

### **What is Climate Resilience and Why it Matters Presentation 2.10 – 2.30**

#### ***Table Session – Experiences of Climate Resilience 15 MINS TOTAL 2.30 – 2.50***

**5 MINS** - Begin with talking to a neighbour about key take homes from the talk, encourage everyone to share (KEEP TRACK OF TIME).

**10 MINS** – A full round table discussion – please make note of the main questions/points/reactions being raised. The discussion around the table can be a place to vent, but also one into which ideas, experiences and successes are fed back into the group, ensure that everyone is heard as much as possible. It's okay to shut down a point and move on if it is becoming too dominating.

Case studies distributed to tables at this point.

***Table Session – Stories of Climate Resilience 40 MINS TOTAL 2.50 – 3.30***

**7 MINS** – Each table group will read aloud, then discuss one of five case studies. Thoughts and feedback, as well as any possible examples from their own dioceses will be added on post it notes. After the 7 minutes the group will move on to the next table and case study (5 case studies in total)

**Short tea break - 10 Minutes**

***Table Session – Barriers to climate resilience projects 3.40 – 4.05***

**5 MINS** – Writing biggest barriers to climate resilience projects on post-it notes

**15 MINS** – Group to briefly describe their post-its and group them together into relevant groups (e.g. funding/community etc.)

***10 MINS – Feeding back to the room***

During feedback groups of post-its from different tables will be brought together by the facilitators. Participants will return to a group of barriers they are most interested/invested in.

***Table Session – Overcoming the barriers 4.05 – 4.45***

**10 MINS** – Read through post-its of the particular barrier groups in the centre of the table on post-it notes

**25 MINS** – Work through each post-it as a group, making suggestions and writing down on post-its possible ways to overcome these barriers. There is no limit to what the suggestions might be

***10 MINS – Feeding back to the room***

***Final Feedback and Questions – 15 MINS***

Share the two questions (below) on the template with the table and facilitate the discussion in pairs/threes.

1. What lessons do you think are transferable from your context to others?  
How can your experience help others?
2. What would you like to do next in terms of delivering action? What support do you need – and who do you think could offer this?
