

This archive contains files containing data and analysis from

Project ES/R01163X/1

Performance Related Pay and Health: An Interdisciplinary Study: Experiment 2.3 – PRP and Social-Evaluative Threat

The following files have been archived:

File name	Description
exp2.3_cortisol.csv	This file contains the dataset generated by analysing cortisol levels in each salivary sample provided by participants. Each row corresponds to one saliva sample.
exp2.3_survey.csv	This file contains the dataset generated by Survey 1 and Survey 2. Each row corresponds to one participant.
exp2.3_performance.csv	This file contains the dataset generated by zTree after each experiment session. Each row corresponds to one participant.
exp2.3_rank.csv	This file contains a dataset generated by manually counting rank placement for each participant within their session, for both experimental and control sessions.
exp2.3_variable_descriptions.pdf	This file contains descriptions of each variable (column) found in the dataset files
exp2.3_consent_form.pdf	Consent form for participants
exp2.3_information_sheet.pdf	Information sheet given to participants
exp2.3_doc_survey1.pdf	This file shows the first questionnaire form
exp2.3_doc_survey2.pdf	This file shows the second questionnaire form
exp2.3_program_con_nonPRP.ztt	This file contains the zTree code used to run each Control nonPRP session
exp2.3_program_con_PRP.ztt	This file contains the zTree code used to run each Control PRP session
exp2.3_program_exp_nonPRP.ztt	This file contains the zTree code used to run each Experimental nonPRP session

exp2.3_program_exp_PRP.ztt	This file contains the zTree code used to run each Experimental PRP session
exp2.3_protocol.pdf	This file contains the research protocol for the experiment

The cortisol, survey and performance dataset can be linked via the participant, session and desk IDs.
