Is there another enumerator for this household? Yes/No

Who is the secondary enumerator for this household?

00. INTRODUCTION TO THE HOUSEHOLD TO BE INTERVIEWED

CONVEY THE FOLLOWING INFORMATION TO THE RESPONDENT:

Thank you for the opportunity to speak with you. We are a research team from CIAT working with the REACH group within the University of Oxford.

We are conducting a survey to learn about decision-making on water choices within the household, as well as land, livestock, assets, and livelihoods. Your household has been randomly selected to participate in an interview, for which your answers will inform our research. The survey includes both a section to be asked about the household generally, and an individual section, which will be asked to every individual 18 years and older in the household.

Your participation is entirely voluntary. You can choose to not answer any question, and may withdraw from the interview at any point if you wish. Your answers will be completely confidential; we will not share information that identifies you. We will not share your answers with anyone outside the research team. We will not tell other household or community members how you responded.

As the Individual who is well informed and makes decisions about the household's water portfolio, such as where to get water, who collects the water, how much is collected, and how it is used in the household, we would like to ask you the questions in the household section.

Before I start, do you have any questions or is there anything which I have said on which you would like any further clarification?

May I proceed with interviewing you and members of your household?
