

Theme	Definition	Example
Impact on flood victims	Observations of how the flooding impacted flood victims, including perspective taking and general concern.	<i>"because my sister was directly involved in it, she had to leave her house..."</i>
Lack of control	Flooding as beyond the control of themselves or others.	<i>"I can't control the situation of rising water..."</i>
Impact on property and possessions	Mention of negative impacts on livelihoods, damage to property, and possessions.	<i>"damage caused to people's houses..."</i>
Aid to self or others	Support offered in the aftermath of floods	<i>"...the local community acted together...helped everyone within the village when the houses started flooding..."</i>
Lack of flood mitigation	A dissatisfaction with prevention measures in place pre-flood and delays in responding post flooding.	<i>"they spent a lot of money on sea defences and they seem to have made things worse"</i>
Lack of personal impacts	Described themselves as not personally impacted by the floods in any way.	<i>"did not know anything about the flooding, never heard of it"</i>
Disruption caused by flooding	Reference to restricted mobility or amenities caused by the flooding.	<i>"...our village was cut off by water"</i>
Financial stress	Description of costly repairs, or insurance pay outs and problems.	<i>"some people did not have insurance"</i>
Severity	Describing intensity of the weather leading up to the flooding or the extent of the damage caused.	<i>"how quickly water had risen in local canal which caused red alert for our area"</i>
Reoccurrence	Description of the floods as commonplace or observation of people suffering repeatedly.	<i>"I have experienced it in 2007..."</i>
Media reporting	Reference to seeing the impact of the flooding through different forms of media.	<i>"...seeing what people had gone through and lost on the news"</i>
Attribution of the flooding event	Describing, or assigning cause, to the flooding event.	<i>"it was because of climate change..."</i>
Miscellaneous	Rare responses including victim blame, faith, personal resilience, or non-specific responses including the repetition of the emotional response or a nonsensical answer.	<i>"some of them could have helped themselves more"</i>
