

ESW0024261 Covid Intimacies Interviews Information

Interview scheme

The interviews were semi-structured. Topics generally followed a similar order, however in some cases the order was adjusted to the flow of the participants responses. Where a topic had already been addressed in response to an earlier question, specific questions were not asked to avoid repetition.

Interview Mode

The interviews were online, on or off camera according to preference of interviewee.

Interviewers

Interviews were mostly undertaken by the same female interviewer, with the exception of those interviewed by Interviewer 2 (as indicated) who was male.

Recording

Interview talk was automatically recorded and generated downloadable transcripts, which were checked and corrected against the recording for accuracy.

Transcripts

Transcripts were fully anonymised, with the use of pseudonyms and any potentially identifying personal details or characteristics redacted.

[...] indicates redaction or substitution of a more general description for anonymisation purposes, or at the interviewee's request.

Self-identity information

Ethnicity – black/white/Asian or Other identified

Nationality -British is inclusive of English, Welsh, Scottish, Northern Irish;

[Mainland] European is used instead of specific countries; and Other
